

Support Tripod

Allows you to mount the MicroScribe for on-site measurement and inspection.

Hand Switch

Serves same function as foot pedal.

This two button pager-style actuator can be held in the hand or rested on the desktop.

Rugged Carrying Case

Protect your MicroScribe with this rugged, custom-designed carrying case.

Double Digital Foot Pedal

Allows you to control digitizing functions and other commands with both feet (not available in all 3D digitizing software programs, refer to users manual).

Universal Power Supply

Immersion offers a universal power supply. Our Universal power supply accepts any standard IEC cable and conforms automatically to incoming voltage.

Digitizing Fixture Plate

Allows your MicroScribe and model to be secured to the same surface, increasing stability and accuracy. Comes with an assortment of non-marring toe clamp assemblies.

Standard Tip

The standard MicroScribe tip that ships with all systems. If the tip in use is worn or dull, it should be replaced for maximum accuracy.

Ball Tip

MicroScribe-compatible tip with 1/8" ball on the end. Perfect for digitizing delicate surfaces that may get scratched with a normal tip.

Extra Fine Tip

A thinner version of the standard MicroScribe tip. Suitable for digitizing small items and reaching into areas inaccessible with the standard tip.

Digitizing Platform & Fixturing Putty

Keeps your models securely in place and your desktop clean. Our precision machined plastic platform provides a stable surface and easily facilitates repositioning your model during the digitizing process.
